

AMENDMENTS TO THE SPECIFICATION

In the specification at page 14, line 25 to the end of the page, please delete the existing paragraph and structure and replace with the following paragraph and structure after implementing the following changes:

In a first aspect, the invention provides a method of synthesis of linear or cyclic peptides or C-terminal modified peptides, or of on-resin cyclisation of molecules, comprising the step of linking an amine nitrogen atom to a compound of General Formula I

in which the ring
